

Use the SendOutCards.com system to get all the referrals you can handle!

Have you ever wanted to send a card to someone but forget to do it or you simply didn't have time to do it? **Have you ever wanted to send a series of follow up notes** to a business prospect or customer, but didn't have a system to keep track of who and when to send it to?

Did you know that **62% of the reasons customers fail to continue business with you is because of perceived indifference?** It costs you 6 times more to attract a new customer than it does to retain a current one.

The SendOutCards.com system solves these problems...

For those prospects, clients and referral partners you want to stay in touch with regularly, you can send a card a month with one single click of a mouse.

Here's how it works...you can choose from the 17,000+ cards provided, or you can custom design your own cards for less than a dollar with the built-in web-based software, PicturePlus. Then you set up a multiple-piece mailing campaign using a combination of thank you cards, holiday cards, cards sharing suggestions or tips that showcase your expertise, invitations to a public workshop you are offering, requests for referrals – anything you choose to keep your name in front of them each month.

Every time someone purchases your products or services, enter their name into the system and send your campaign cards with the single click of a mouse. It's that simple! The campaign system mail merges the name into the salutation and includes your personal note (printed with your own handwriting and signature), then addresses, stuffs, licks, stamps ((with a real stamp) and takes it to the post office on the date you have specified. **Over the coming months, your customer will receive hand-written, personalized cards from you without you lifting a finger!**

What two RE/MAX Brokers have to say about SendOutCards...

"We use SendOutCards referral system and it generates us quality referrals every month. **One referral came from a greeting card and it generated us \$29,380 U.S. in commissions.** This system is extremely simple to use, it will save you time and money and it is very powerful. Over the years we have tried just about everything and spent thousands on marketing that never produced a dime. **The SendOutCards referral system is simply the best we have used.**"
